

The President's Corner

by Mickey Breunig, President -LMAC

Christmas is getting close, which means some of us are about to get a new plane! Some took advantage of the swap meet and found something new for themselves.

There were plenty of deals to be found at the swap meet, unfortunately, I didn't recognize them until they were being walked out the door. There were several new sellers and everything went very smooth. Joe Woods did a great job of getting everything organized and Martin Weinstock did a nice job of running it.

The Numb Thumb Event will be held on New Year's Day. The flying will be from 10 am or so until you can't feel your fingers anymore. We will have some hot chili to eat for lunch and to warm us up. It seems that every year that the weather is forecast to be less than favorable I get asked if we are still having it or when is the rain date. It does not matter what the weather is, we will be having the Numb Thumb January 1st.

The meeting will be held Thursday at 7 Pm, see you there.

Minutes of November 8, 2018 Meeting

by Jim Newberry, Secretary

- The monthly meeting of the Lexington Model Airplane Club (LMAC) was called to order on November 8, 2018 by club president Mickey Bruenig at 7:05pm.
- A motion was made by Mickey Bruenig to approve the minutes of the October 11, 2018 meeting minutes posted in the monthly newsletter. Seconded by Mike Lambert and approved by vote of members present.
- Mickey Bruenig made a motion to approve the treasurers report as reported in the newsletter, was seconded by Dave Price and approved by vote of the members present.
- Dave Price reported that we are currently training two students and that training for the year is over.
- Mickey Bruenig was approached by the Legacy Center asking if we would be willing to help their residents with model airplane builds. The specifics of the program are not yet defined and the club is looking for someone to volunteer to define the program and potentially help run the program. Dan Thompson was suggested as a leader but he was not present. Further discussion will be held as details develop.
- Election of officers was held at the November meeting. The following are the officers for the 2019 calendar year:
 - President – Mickey Bruenig
 - Vice President – Paul Bail
 - Treasurer – Carroll Ware
 - Secretary – Jim Newberry
 - Training Coordinator – Jeff Cummings
 - Senior Advisor – Gale Moore
 - Newsletter Editor – John Royalty
 - Safety Officer – Mike Lambert

Mickey Bruenig made a motion to adjourn the meeting at 7:45pm, seconded by Gale Moore and approved by vote of members present.

Next LMAC Club Meeting:
Thursday, December 13, at 7:00 PM

Meeting Location:
Morning Pointe Senior Center
150 Richmond Road
Lexington, KY

Visitors are Welcome !!

Blast from the Past

by David J. Price

This series of articles will present advertisements from vintage modeling magazines. The intent is to illustrate technological advances that have taken place in our hobby. For some, it will bring back memories, for newcomers it will present a piece of history of radio control model aviation.

Here is an advertisement from the April 1948 issue of Model Airplane News for the Stanzel Bee-Line Jets. Not an RC or CL, more of a tethered aircraft. More information on Stanzel company can be found at: <http://www.stanzelmuseum.org/history.html>

According to the web site:

1948 The Stanzel company introduces the "Bee Line" series of model jet airplanes which are flown along a 100- to 400-foot long steel wire and propelled by CO2 gas cartridges.

According to:

<http://www.airplanesandrockets.com/magazines/american-modeler/stanzels-schulenburg-american-modeler-january-1961.htm>

Branching out into another sort of model in 1947 the Stanzel firm, unveiled several flown via what they called "Bee-Line." These miniatures had fuselages just large enough to hold a standard CO2 cartridge; they were "flown" on a fine steel wire strung tight between two supports. At first a 400' length of music wire was supplied with these kits, but customers got all tangled trying to unroll this wire, which was .012 dia., so the length was cut to 100'. Since the models traveled along the wire at speeds well over 100 mph it was standard practice to put some soft pillows at the far end to bring them safely to a stop. These models were in production until 1950.
