

The President's Thoughts

By Mickey Breunig, President

It's just about that time. I have seen some nice weather lately and it has given me the urge to get out and fly something. It's time to get your builds finished up for the year and get all of your planes in flying condition. Summer will be here before you know it.

At the meeting this month we will be lucky to have Jim Martin speak to us with insight and information about the proposed FAA rules for model aircraft as they have been written so far. Being a FAA employee as well as an Associate Vice President of AMA, Jim has a unique perspective on the situation. He should be able to answer all of our questions as well as give us an idea of what we can expect going forward.

I hope to see everyone at the meeting.

Michael Breunig

Aviation Day Fly In

National Model Aviation Day Fly-In , August 15, 2020 Hosted by The Lexington Model Airplane Club

Hello Everyone,

Consider this your formal invitation to take part in a very special Fly-in. The Lexington Model Airplane Club will be hosting a Fly-in on National Model Aviation day - August 15, 2020. Start time 8 am. End time – When you get enough flying. We are planning to make this a special day to honor our past and present members who aren't flying anymore but still want to be involved in the hobby. We will also have open flying for those of you who just want to fly.

The plan is to have people bring out a plane or planes that belonged to one of our past member or as I stated above a member that isn't active but you would like to honor them. The planes don't have to be flying. Any plane from a past or non-flying present member is welcome. This isn't limited to LMAC members we welcome planes of other clubs and their members as well. Flying the plane is optional but we would like to have you spend a few minutes talking about the plane and the past member that owned the plane.

Mark your calendar for this event and invite anyone you think might enjoy this event. We will have plenty of time for open flying if you don't want to bring a plane from the past. Just come out and enjoy the day. I think you will find it to be a great event that will always stand out in your mind as a special day. We will have more details later.

Thank you for being a Member of LMAC,
Curtis Adams

Minutes of February 13, 2020 Meeting

By George Kissick, Secretary

The meeting of the LMAC club was called to order by Mickey Breunig on February 13 at 7:07 p.m. There were 13 members present. The February meeting was held at the Tatescreek Public Library. Meetings will no longer be held at the Morning Pointe Center.

The March meeting is scheduled for:

Thursday, March 12, 2020, 7:00pm

Meeting Location:

Buds Gun Shop

1105 Industry Road Lexington Ky

There were no reports from safety, training, or senior advisor. Our guest speaker this month will be Jim Martin, the Associate Vice President for District 3 in Academy of Model Aeronautics (AMA). Jim's experiences and training qualify him to address many of the questions one may have regarding the FAA Remote ID Ruling.

Old Business: The camera on the left side at the field may have some moisture issues. Dan will investigate when the weather permits. Discussion on the name for the memorial fly in was discussed. Curtis Adams suggested the following names:

- National Model Aviation Day of Legends
- Legends Memorial FlyIn
- The subject can be discussed further at the March meeting.

Curtis mentioned details on the fall classic in an email sent out on Mon, Feb 24, 2020. The secretary will read the e-mail if Curtis is not available for further discussion.

2020 mowing season: Until we are told otherwise the mowing will be done by Bryon Alderman

New Business: The 2020 budget was brought before the board by Carroll Ware. A motion to approve the budget was made by Mickey Bruening and seconded by Dave Price. The budget was voted on and approved by the membership present.

The Lock combination at the LMAC field will be changed in April.

We had a new member join us at the meeting. Please welcome Daniel Maloy. Dan got us the March meeting space for Thursday night. Also, welcome back Francis Smith who will be joining us.

A motion to adjourn was made by Mickey Breunig and seconded by Carroll Ware. The meeting adjourned at 7:52 p.m.

Blast from the Past

By David J. Price

This series of articles will present advertisements from vintage modeling magazines. The intent is to illustrate technological advances that have taken place in our hobby. For some it will bring back memories, for newcomers it will present a piece of history of radio control model aviation.

Here is an advertisement from the September 1962 issue of American Modeler for the Kraft Simul 10 Transistor Radio. This was a 10 channel "clicker" radio (yes, toggle switches) and was available on a custom built basis only. The Superhet 10 receivers were expensive at \$89.95.

NEW! **KRAFT SIMUL 10 TRANSISTOR TRANSMITTER.**
ON A CUSTOM BASIS ONLY—ORDER EARLY!

THIS LITTLE PACKAGE packs a POTENT WALLPAP. Much more than you'd expect from something this small. EXTENSIVELY TESTED under actual flight conditions, this small unit packs more punch than the vacuum tube version. This is due to a very efficient design, which allows the ultimate from every component. Especially graded and selected transistors by Philco make this dream transmitter a reality. Imagine a package only 5/4 x 3 x 6, weighing only 3 pounds 12 ounces, giving ten channels simultaneous operation from an inexpensive 9 volt battery outperforming almost all vacuum tube types! Center loading of the antenna makes the 26 ma at 9 volts punch into the air the signal you need to override interference. Available on a custom built basis only. Each unit checked out under personal supervision of PHIL KRAFT—GUARANTEED to meet his specs—or IT IS NOT SHIPPED. We urge you to get your orders in for these custom built jobs. This KITX10M, designed for the KRAFT CUSTOM SUPERHETS with the Medco read bank cps, will be THE R/C MULTI TRANSMITTER SENSATION OF 62. Drop shipped from California—deliveries in turn after placement of order. Price is only \$118.50! Order: KITX10M. This unit will not be offered in a kit form until 1963. Circuit is copyrighted and will not be published until kit is available.
