Established in 1959

## LEXINGTON MODEL AIRPLANE CLUB

### ***The President's Thoughts***

*By Mickey Breunig, President*

The weather is getting better, and I saw a few people at the field last week. It won't be long before nice flying weather will be almost daily.

With the start of regular flying for the year, it is a good time to refresh ourselves on everything we do to be safe and courteous at the field.

Let's start the year out right with a refresher on the club rules. The club rules are there to make it as safe as possible for everyone as well as to simply be courteous. Take some time to read the rules on the website or in the back of the pavilion. They also have been provided on page 2 of this edition of the newsletter.

It's easy to forget something over the winter critical in our routines charging or preparation to a flight. Refresh yourself on your regular routines for flying. Be sure to put an emphasis on safety in those routines. Some of the things we did last year without even thinking are easy to forget over the winter. A good refresher or even possibly a list is a good start for the spring.

I hope everyone takes the time to make preparations for a good year in hopes of not having regrets of a bad year in the fall.

I hope to see you there.

Michael Breunig  
[mbreunig@windstream.net](mailto:mbreunig@windstream.net)

## LMAC Field Rules

Please Refresh your memory on these rules.

- To fly at the Club Airfield, you must be a member of AMA and a member of the Lexington Model Airplane Club.
- Membership card must be posted on the Airfield Frequency Board before you fly.
- Non-Members must be accompanied by a club member in order to fly.
- The last person leaving the airfield property must lock the airfield gate for security purposes. The airfield gate is secured with two locks connected with a loop of chain. The Utility company will use the key type pad lock to access the airfield. It is critical that both locks are placed on the loop of chain so that either lock will open the gate.
- If an aircraft lands or crashes on the landfill facility -- Do not jump the fence to get the aircraft. Members must get permission to go on the landfill property. If an aircraft lands or crashes on the landfill facility during landfill business hours, the club member must go ask for help from the LFUCG personnel at the landfill scale house. Kindly ask the landfill employee for help in retrieving the aircraft. If the aircraft goes down on the landfill facility at a time outside the normal landfill business hours, the club member must wait until the landfill reopens on the next business day to contact LFUCG personnel at the scale house.
- Do not enter the Landfill property with out permission. Any entry upon the landfill facility in violation of the above procedures, shall be deemed a breach of the Agreement which may result in the immediate and permanent loss of the airfield to all club members.
- Aircraft must be pointed toward the runway when starting or running. No one should stand in front of or to the side of an aircraft when engines are running.
- Batteries of electric aircraft must not be connected up for flight in the shelter area. Only energize electric aircraft in the starting stand area or pilot's flying position.
- Aircraft may be taxied out of the pit area (toward the runway), but must not be taxied under power toward the pit area or shelter area. Shut down engine on runway before returning to taxiway or pit area.
- All aircraft, including helicopters, must takeoff and be flown from the asphalt or grass runway
- not fly over the pit side of the runway.
- The centerline of the active runway should be used as the takeoff point for all aircraft. If the active runway is the asphalt runway, it is permissible for helicopters to use the East end of the grass crosswind runway or the U-Control Circle for hovering practice.
- With the exception of events flown under AMA Competition rules, after launch, except for pilots or helpers being used, no powered model may be flown closer than 25 feet to any person.
- ABSOLUTELY NO FLYING OVER THE SHELTER SIDE OF THE RUNWAY. No flying over the pilots position, starting stands, shelter area or parking lot. Take Offs and Landing are to be done from the active runway. Flying maybe accomplished using the crosswind runway as a reference when wind and/or sun glare is a factor.
- All pilots are to stand at the pilots flying positions at the double white line when flying if more than one aircraft is active.
- When more than one aircraft is flying, a right-hand or left-hand pattern (depending on the wind direction) should be agreed too. A spotter is also recommended.
- Pilots must call out activities to other pilots that include Takeoff, Landing, Dead Stick, and Crossing the runway to retrieve an aircraft. This must be done LOUD enough to alert all Pilots.
- HIGH SPEED PASSES AND AEROBATICS ARE NOT ALLOWED OVER THE ASPHALT RUNWAY. They should be done at least 100 feet beyond the runway.
- Low speed passes and "touch and go's" can be done on and over the runway, but other pilots must be alerted.

## Treasurer's Report

By Blake McBrayer, Treasurer

Dues information and forms, click on this link .....  
<http://www.lmacky.org/membership.html>

115 Paid Members as of December 31, 2021

Total renewals for 2022 as of 2/28/22 = 56

**2022 Membership stickers and  
2022 gate code will go out the first half of March 2022**

**2022 Gate lock will be installed 1st half of March 2022**

**2021 Gate lock will be removed 1st week of April**

## Meeting Minutes from February 12, 2022

### Call to Order

Call to order of the Lexington Model Airplane Club  
by Mickey at 10:30a.m. 02/12/2022

Continuation from last month's meeting

1. Budget 2022
  - a. Mowing
    - Increase 17%
  - b. Paving fund 3750.00
  - c. Winchester fund 750.00
  - d. Balance accepted for approval by Mickey and seconded by Dan
    - (i) Budget voted on and approved by the members present
  - e. Checking balance after items paving and Winchester fund 9061.00

January meeting adjourned

February meeting opened

### New Business

1. Treasury report voted on and approved
  - a. Mickey made the motion and John Royalty seconded
2. Minutes
  - a. Mickey made the motion and John Royalty seconded
1. Training
  - a. Jeff will have 3-4 students starting in April

### Old Business

1. Vintage Flyin
    - a. May 20, 2022
    - b. Only vintage planes on Friday. Saturday is open to all planes
    - c. Donations will be accepted as entry fees
  2. Swap Meet
    - a. May 28, 2022
    - b. Setup in the parking lot
  1. Meeting Adjourned
    - a. Mickey made motion and Lee seconded
- Meeting adjourned by members present

## Blast from the Past

By David J. Price

This series of articles will present advertisements from vintage modeling magazines. The intent is to illustrate technological advances that have taken place in our hobby. For some it will bring back memories, for newcomers it will present a piece of history of radio control model aviation.

Here is an advertisement from the June 1933 issue of Model Airplane News for Knife-cut balsa sprays (sticks) from Selly MFG. Co. Inc. (1373A Gates Ave., Brooklyn, NY). The advertisement claims that you get accurate and smooth on all four sides of the strip; and that the knife compresses the balsa fibers which increases the strength of the wood. I use a balsa stripper to get the sticks I require from a balsa sheet. How about 80 strips for 5 cents? Postage was 15 cents minimum.

**NEW! SAVE MONEY ON SELLEY'S EXCLUSIVE  
Knife-Cut Balsa Sprays**

**100% better than saw-cut sticks!**

AT LAST! The model builder's dream realized! Selly scores the greatest beat in history! The first and only improvement in balsa wood production! After two years experimenting, Selly has created and perfected a semi-automatic machine that produces fine selected white balsa strips of INCREASED STRENGTH, PERFECTLY STRAIGHT, ABSOLUTELY ACCURATE TO SIZE, AND GLASS SMOOTH ON ALL FOUR SIDES!

Only due to the tremendous production, with no waste, can we offer these NEW LOW PRICES, passing the SAVINGS on to you!

Compare this wood with cut balsa. Saw-teeth tear the fibres, weaken the strength and produce uneven, inaccurate-sized sticks.

Our new knife compresses the fibres and actually increases the strength of the wood. SELLEY ALONE can supply you with any stick from 1/64" sq. to 3/16" sq., perfectly straight, uniform and accurate to size! Order now and stock in on all sizes!

PATENTED LATA BALSA SPRAYS 18" lengths

## ***Next Meeting February 12, 10:30am***

**Next LMAC Club Meeting:**  
**Saturday, March 12, at 10:30 AM**

**Meeting Location:**  
**Buds Gun Shop**  
**1105 Industry Road**  
**Lexington, KY 40505**

**Everyone Welcome !!**

## ***Thank You to Buds Gun Shop!***

I would like to give a huge THANK YOU to Buds Gun Shop and especially Dan Moley for the continuous hospitality each month during the winter season. Dan Moley several years ago volunteered Bud Gun Shop large meeting room located upstairs in their facility, this room is where they have their Concealed Carry Classes. The use of this room became very important during the COVID, because it allowed the club to hold our monthly meetings during the pandemic. Previous too the use of Buds Gun Shop upper room, the club meet at Lexington Public Libraries. When the pandemic hit the libraries closed to the public and didn't allow use of their facilities anymore. So, it forced us to look elsewhere. So, if your need ammo or anything that has to do with firearms, please visit Buds Gun Shop. They will be happy to take care of your firearm needs.

Thanks to Dan Moley and Buds Gun Shop and Range.
