

## ***The President's Thoughts***

*By Mickey Breunig, President*

Spring is just about here and with it comes a rather disagreeable mother nature, and she has raised havoc at the field.

**Dave Price talked to Richard Boone at the landfill on Monday, March 6 about the electric gate. Richard said that the main gate will remain OPEN, until they get power restored. He said they are operating at the landfill with generators. So with that being said our field will NOT have any power either until they get power restored.**

As most of you have experienced in the past week with your homes, the shelter has sustained some damage from the storm. I have not been able to get to the field to access the damage but have seen some of it on the cameras. It didn't look like there was any major damage to the shelter, but there is damage. It looks as if it is some of the siding on the inside ceiling of the shelter that has been torn off. We need to collect all of this and preserve it so we can put that back up. If anyone is able to go to the field and give more of an in-depth inspection of damage so we can determine what needs to be done to repair. I am sure this will be a topic at the meeting.

Our next meeting will be at Buds Gun Shop at 11am Saturday, March 11th.

Several of us are planning a trip to the Swap meet in Dayton toward the end of March. Combined with the swap meet, we plan on also visiting the National Museum for the US Air Force also in Dayton.

The swap meet is March 24, and 25. It ends rather early on Friday the 24th and rather than drive directly home after visiting the swap meet on Friday, we will go to the museum. The swap meet closes at 2pm on Friday.

Several of us will leave the swap meet early on Friday and go to the museum after lunch. Anyone is welcome to join us at the swap meet or the museum.

The Dayton Modelrama is a massive swap meet and is the largest in the area. It is approximately 4 times the size of our swap meet, it lasts 2 days, and has most everything you could want. If you haven't been and enjoy swap meets you should put it on your list of things to do.

The National Museum for the US Air Force is the best museum for military planes in the country. The museum has not only military planes but also NASA memorabilia also.

The museum is at least 4 massive hangers and can take more than a day to go thru it entirely. If you have any interest in airplanes at all, this is a trip into history that will amaze you.

I hope to see you there.

Michael Breunig

## ***Meeting Minutes from February 11, 2023***

***by John Royalty***

### **Continuation of January Meeting**

#### **Meeting Called to Order at 10:55 am**

Discussion of 2023 Budget figures that were hand out during meeting.

Motion made to adjourn February Meeting by Sylvester H

Seconded by Curtis A

### **February Meeting Minutes Below:**

#### **Call to Order**

Call to order of the Lexington Model Airplane Club by Mickey 11:05 a.m. 2/11/2023

- A. February Minutes accepted for approval
  - a. Dan Thompson made the motion
  - b. Curtis A seconded the motion
  - c. Motion approved by members present.
- B. Treasury Report
  - a. Mickey made motion to approve.
  - b. Martin W seconded the motion.
  - c. Motion approved by members present.
- C. Safety
  - a. No Report
- D. Training
  - a. No Report
- E. Old Business
  - a. No news on charging stations, still getting supply list and pricing.
  - b. Fall Classic Volunteer list still in the works
  - c. Flex Innovations, no meet scheduled for this year. Will probably be 2024.
  - d. Runway repair discussion (cracks,, etc)
- F. New Business
  - a. Club was contacted by an individual about using or renting flying field for Rocket launches. The individual was told no because of the city decision and close proximity to the landfill.
  - b. Another person contacted club and inquired about possible using field for viewing night sky for photography. Person is willing to join club. City has to be notified when this person would be at field during nighttime hours.
  - c. Discussion about registering field with FAA
  - d. New Member Noah Olson was present with his Dad. Welcome Noah

Meeting was adjourned at 11:33am

Seconded by Gayle M.

# Blast from the Past

By David J. Price

This series of articles will present advertisements from vintage modeling magazines. The intent is to illustrate technological advances that have taken place in our hobby. For some it will bring back memories, for newcomers it will present a piece of history of radio control model aviation.

Here is an advertisement from the April 1936 issue of Model Aircraft Builder for the Selley-Tex “moulded” kits. The advertisement claimed that “To everyone who ever FAILED to build an All-Balsa-Stick Kit” Selley offered a full money back guarantee. A sort-of ARF in 1936, the fuselage and other parts are pre molded fabric that you joined and glued (fiberglass? –I could not find what the composition was). Similar to the construction of fiberglass pattern airplanes and ducted fan jets and you still had to build the wings. There was the article about “Developments in the Model Industry” later in the same magazine issue that cited the new construction technique.

## ATTENTION unsuccessful MODEL BUILDERS!

To everyone who ever **FAILED** to build an All-Balsa-Stick Kit  
**SELLEY OFFERS this FULL-MONEY-BACK-GUARANTEE**

Remember the many advertisements that SELLEY-TEX has over All-Balsa-Stick Kits, we mean the ones which said that you could build SELLEY-TEX "moulded" construction the easy way and that you would not have to build the wings. This revolutionary moulded method is now being used by all the best model builders. This revolutionary moulded method is now being used by all the best model builders. This revolutionary moulded method is now being used by all the best model builders.

**IF YOU DO NOT JUDGE THE SELLEY-TEX CONSTRUCTION SET YOU BUY TO BE THE EASIEST, SIMPLEST AND MOST PRACTICAL WAY TO BUILD A PLANE MODEL, PLEASE TRY IT FIRST. JUST RETURN IT TO US AS RECEIVED AND WE WILL GLADLY REFUND THE FULL PURCHASE PRICE IMMEDIATELY AND WITHOUT QUESTION.**

**READ CAREFULLY these 10 ADVANTAGES SELLEY-TEX offers over All-Balsa-Stick Kits!**

- 1. EASIER TO BUILD.** The moulded parts make it possible to build a plane in less than 10 minutes. No need to glue, no need to sand, no need to paint. The moulded parts are so easy to assemble that even a child can build them.
- 2. MORE PRACTICAL.** Selley-TEX offers a complete set of instructions, including a list of materials, a list of tools, and a list of parts. This makes it possible to build a plane in less than 10 minutes.
- 3. MORE DURABLE.** The moulded parts are made of a special material that is stronger than balsa wood. This makes the plane more durable and able to withstand rough handling.
- 4. BETTER FLYING.** The moulded parts are designed to fly better than balsa wood. This makes the plane more enjoyable to fly.
- 5. POSITIVE MEANS OF BALANCING.** Selley-TEX offers a complete set of instructions, including a list of materials, a list of tools, and a list of parts. This makes it possible to build a plane in less than 10 minutes.
- 6. PATENT APPLIED FOR.** The moulded parts are a new invention. This makes them more valuable and more desirable.
- 7. MONEY BACK GUARANTEE.** A full refund is given if you are not satisfied with your purchase. This makes it possible to build a plane in less than 10 minutes.
- 8. THE EASY WAY.** Selley-TEX offers a complete set of instructions, including a list of materials, a list of tools, and a list of parts. This makes it possible to build a plane in less than 10 minutes.
- 9. THE BEST WAY.** Selley-TEX offers a complete set of instructions, including a list of materials, a list of tools, and a list of parts. This makes it possible to build a plane in less than 10 minutes.
- 10. THE MOST PRACTICAL WAY.** Selley-TEX offers a complete set of instructions, including a list of materials, a list of tools, and a list of parts. This makes it possible to build a plane in less than 10 minutes.

# Developments in the Model Industry

**W**HAT is considered the outstanding development in model airplane kit manufacture has been credited to the Selley Manufacturing Company for the perfection of the Selley-Tex Molded Construction employed in their new kits.

Moulded Parts for Rearwin Sport

It is a distinct departure from present day model construction as we

Selley-Tex Goshawk in Action

are familiar with it. The fuselage sides, cowlings, pants, dummy motor, fairings, bombs and other details are beautifully formed, bearing out the most minute details, in fact all those parts which are considered by many model builders as difficult to make, are ready formed, making the building of these models simplicity itself.

Armour Selley, President of the Selley Manufacturing Company is a

model builder of the old school, in fact, in 1912 Mr. Selley held every world's model plane record. An editorial in "Aircraft" the leading aeronautical magazine at the time called him the champion model flyer of the world. The boy who in 1912 broke every existing flying record is now president of his own company with one of the world's largest manufacturing plants. Many developments now accepted as commonplace are credited to the ingenious Mr. Selley. It was he who in 1912 was the first to use a slow turning propeller. Up to that time only small high speed propellers had been used in contest models.

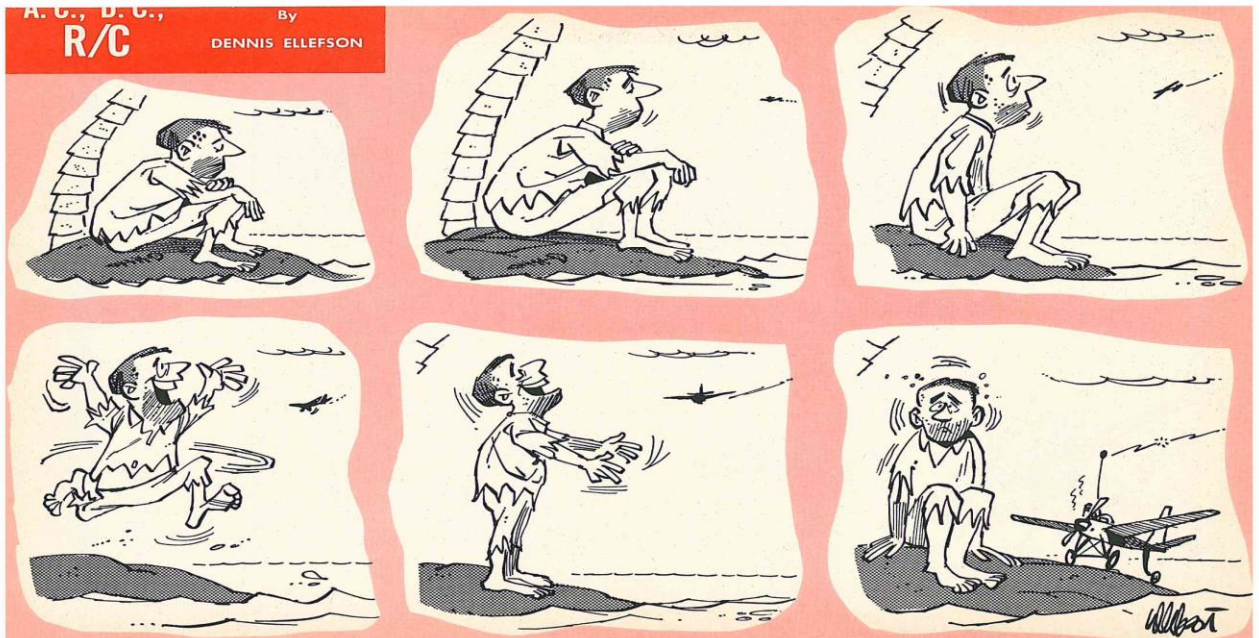

The present line of Selley-Tex models consists of: Rearwin Sport, Monocoupe, Vought Corsair "Junior", Bellanca "Swoop", Curtiss "Osprey", ranging in price from 75c to \$1.25 and a line of larger models of the Ryan Sportster, Fairchild, Waco "C", Goshawk, Waco "D" Military and Boeing F4B4 ranging in price from \$3.00 to \$4.00.

## Introduction to IMAC Webinar

**Saturday, March 11th from 9:00am to 11:00am Eastern Time**

To sign up and for the go-to-meeting details, visit [mini-iac.org](http://mini-iac.org), click the "Events" tab and search "introduction to IMAC"

Are you interested in improving your flying skills? How about adding some exciting new challenges to the hobby? Do you like having a ton of fun while meeting some amazing new people?? If so, please join us for a morning webinar to discuss how you can begin your journey of flying scale aerobatics with IMAC!!

At this conference we will be providing the essential information to give all pilots the knowledge and confidence needed to begin participating in IMAC. We will take a brief look back at the organization's history, where we currently stand and what the future looks like. We will discuss what to expect at a typical contest weekend and how to prepare. We will review the basics of the Aresti Catalog (the language of scale aerobatics) and will provide a wealth of information and resources to continue learning after the class is done. Most importantly, we will have a lengthy Q&A session and open discussion to fill in any gaps!

If this sounds like something you might be interested in, we welcome you to stop by and learn what our IMAC club is all about.

We look forward to seeing you soon!!
